

I know you'll probably pass this HR 4026 bill because someone has a new idea that competes with old money of traditional radio. I pay for the service and have made a decision to listen to what I want rather than what the FCC and corporate sponsors will allow me to hear.

Government is a business and the business of politics is to make as much money as you can while in office and reap as many rewards afterwards as possible. This is why lobbyist with the biggest checks get what they want. Next you'll want to censor what is being programmed on XM radio for content like other media outlets.

I'll keep a close eye on this and when I vote this fall I'll make my voice heard, even if you try to silence XM radio's voice.
